Product analyst bringing structured problem-solving and cross-functional execution to sports platforms

Six years bridging finance and product development. Led requirements definition and delivery for financial analytics products, improving accuracy from 30% to 90% through systematic refinement. CFA Level 2. Now focused on applying product judgment and operational discipline to sports technology and fan experiences.

EXPERIENCE

Product Analyst
May 2022 – August 2025

Acuity Knowledge Partners, Bengaluru

- Led product development for financial analytics platforms serving institutional investors, working across five products with focus on two major initiatives: financial statement analysis tool and fund reporting platform
- **Improved product accuracy from 30% to 90%** by reframing feature requests as problem statements, defining requirements from first principles, and guiding cross-functional teams toward optimal solutions within constraints
- Designed and executed **integration of AI-based RFP tool with fund data platform**, creating user flow diagrams that became development blueprint and delivering **15-50% efficiency gains** with minimal development time
- Conducted comprehensive product review combining user interviews, competitive analysis, and UX redesign, proposing product overhaul that addressed declining usage while maintaining accuracy gains
- Became coordination focal point in high-pressure project where communication had broken down, stabilising delivery by documenting decisions and making judgment calls to keep work moving
- Worked in agile environments using Jira, Confluence, Figma, and analytics tools (Pendo) to track user behaviour and guide product decisions

Credit Analyst
September 2019 – April 2022

Acuity Knowledge Partners, Gurgaon

- Analysed borrowers for Texas commercial bank across real estate, energy, retail, and non-profit sectors, performing periodic financial statement analysis and covenant monitoring in Moody's Risk Analyst and CreditLens
- **Fastest progression in 25-member team**, handling all specialised roles within 18 months and becoming trusted analyst for complex financial statements requiring detailed reconciliation
- Maintained 100% accuracy under tight deadlines, calculating loan covenants per agreements and flagging non-compliance for credit officer action
- Established expertise in US-GAAP, IFRS, and sector-specific reporting structures including not-for-profit and sub-government entities
